```
<head>
<style>

h1 {
font-size: 125;
color: white;
}

.diag {
background: linear-gradient(110deg, yellow 40%, pink 40%);
text-align:center;
}

</style>
</head>
<body>
  <div class="diag">
    <br>
    <h1>CODEJIKA.COM</h1>
    <h3> Launching soon... </h3>
    <br><p>[Today's Date]</p>
    <br>
  </div>
</body>
```

Workshop: The 5-Minute Website

Participant Track – Est. 5 Mins:

1. Go to Windows Start> Open Notepad
2. Go to File > Save – Save your file on the Desktop as me.html .
 - a. TIP: Make sure the file is saved with “.html” in the file name & NOT “.txt”
3. In Notepad, type in these lines of code:

```
<body style="background: lightblue;">  
<h1>I can code #codejika <br> My name is:.....</h1>  
</body>
```

4. Click File > Save
5. Go to your desktop. Find your file and double click on it.
 - a. TIP: It should open in a web browser if you saved it correctly.
