How to Schedule CodeJIKA as a Subject

So you've decided to run coding in your school. You love the idea of vocational coding that teaches real, usable skills to your learners.

How To Schedule It:

1. First of all, it's easier than you think. (You don't need to know anything about coding.)
2. Secondly, the CodeJIKA team is here to support you.
3. Select one or two high schools with functional PC labs (no internet necessary) and start with three "Intro" lessons.
4. If it's working well, you expand to the 16 lesson course and more classes and then more schools.
5. Teachers may choose to teach it as a non-core subject for a term.

A. Choose your structure:

How many classes/groups of learners will take part? _____

Recommended 2-4 groups.

From what classes/age? _____

What is most convenient for you?

How many sessions would you like to schedule per group? _____

STARTER : 3 Sessions – 2 visits by Subject Matter Expert.

LITE: 8 Sessions – 3 visits by Subject Matter Expert.

FULL: 16 Sessions – 5 visits by Subject Matter Expert.

You can also mix: For example: 2 groups on STARTER & 2 groups on LITE.

B. Plan your Dates and Learners:

The CodeJIKA Coordinator can help you with this and answer any questions you may have.

TYPICAL SCHEDULE:

Note: This example has 3 groups; 1 on STARTER, 2 on LITE.

Notes:

i. The Subject Matter Expert will offer virtual support when needed. The curriculum is setup for learners to do self- and peer-learning.

iii. Your presence and enthusiasm to support this subject is critical, even if you do not know the material.

iv. Certificates will be available for learners who complete the program.
